

AHMED HUSSIEN

+201003540025 | ahmed.hussien950.ah@gmail.com | [in](#) | [github](#) | [location](#) Kafr El Sheikh, Egypt

Professional Summary

Self-driven Flutter Developer with 2+ years of hands-on experience building production-ready, cross-platform mobile applications. Proficient in Clean Architecture, BLoC, MVVM, and MVI patterns, with a proven track record delivering e-commerce platforms, real-time tracking systems, and AI-integrated apps. Skilled in CI/CD pipelines, Git workflows, Agile/Jira collaboration, and achieving up to 90% code coverage via Unit & Widget Testing.

Experience

Flutter Developer Intern

Oct 2025 – May 2026

Elevate Tech

Remote

- Delivered 3 production Flutter apps in a SCRUM team, contributing to sprint planning, daily stand-ups, and technical estimations via Jira.
- Applied Clean Architecture, SOLID principles, and Design Patterns to build scalable, testable, and maintainable codebases.
- Strengthened code quality through structured PR reviews, Git branching workflows, and streamlined release pipelines using GitHub Actions.

Projects

Super Fitness & AI Coach App | *Flutter, Gemini AI, BLoC, Hive* | [GitHub](#)

Mar 2026 – May 2026

- Architected a scalable fitness platform using Clean Architecture, featuring dynamic workout engines and robust Firebase Auth.
- Engineered an Agentic AI Smart Coach integrating Gemini API with real-time streaming, RAG context injection, and offline Hive caching.
- Optimized UI responsiveness via incremental loading UseCases and achieved high reliability with extensive Unit & Widget testing.

Flowery (E-Commerce) | *Flutter, BLoC, Clean Architecture, Mapbox* | [GitHub](#)

Dec 2025 – Feb 2026

- Developed a comprehensive e-commerce app with a reactive global cart state and seamless Checkout/Payment integrations.
- Integrated high-performance real-time delivery tracking utilizing Mapbox SDK and live Firestore snapshot streams.
- Achieved stable 60 FPS rendering by decoupling map markers from the widget tree and implemented aggressive pagination for feeds.

Flowery Rider (Driver App) | *Flutter, BLoC, Mapbox, Firebase* | [GitHub](#)

Feb 2026 – Mar 2026

- Built a robust delivery partner app utilizing a persistent foreground service for uninterrupted live coordinate syncing to Firestore.
- Implemented smart route caching to minimize Mapbox API calls and enabled direct FCM push notifications via Google Service Accounts.
- Secured app stability with GoRouter lifecycle traps for active orders and centralized Dio interceptors for seamless token refresh.

Technical Skills

Languages & Frameworks: Dart, Flutter (Android & iOS)

Architecture & Patterns: Clean Architecture, SOLID Principles, Repository Pattern, Design Patterns, Dependency Injection (GetIt, Injectable)

State Management: BLoC, Cubit

Networking & Storage: RESTful APIs, Dio, Retrofit, Hive CE, SharedPreferences, FlutterSecureStorage, dio_cache_interceptor

AI & Real-Time: Google Gemini 2.5 Flash (streaming), Firebase Firestore (live streams), Firebase Cloud Messaging (FCM v1)

Maps & Location: Mapbox Maps SDK, Mapbox Directions API, Google Maps, Geolocator

Cloud & Services: Firebase (Auth, Firestore, FCM, Crashlytics, Analytics), Google APIs OAuth2, Payment Gateways (Stripe)

Version Control: Git, GitHub, GitFlow, Branch Strategies, Pull Requests

DevOps & Tools: GitHub Actions (CI/CD), Firebase App Distribution, Postman

Testing: Unit Testing, Widget Testing, BLoC Testing (bloc.test), Mockito, Mocktail, fake_cloud_firestore

UI/UX Design: Responsive UI, Material Design, Custom Animations (Lottie), Shimmer Loading, Figma

Methodologies: Agile, SCRUM, Jira, Sprint Planning, Daily Stand-ups, Code Reviews, PR Workflows
