PROFESSIONAL SUMMARY

Results-driven **Junior Flutter Developer** with proven practical experience in building scalable cross-platform mobile apps for iOS & Android. Proficient in Dart, Clean Architecture, BLoC/Cubit state management, RESTful APIs, and offline caching. Adept at agile team collaboration (Scrum/Jira), CI/CD pipelines, and writing thorough unit and widget tests to deliver robust, high-performance applications.

PROFESSIONAL EXPERIENCE

Junior Flutter Developer | Elevate Tech

Oct 2025 – May 2026

Mobile Software Development • Remote

- Collaborated within an Agile/Scrum team to design and deliver 3 end-to-end mobile applications utilizing **Flutter, Dart, and Clean Architecture**.
- Implemented state management using **BLoC & Cubit**, strictly decoupling UI from business logic for maintainability and scalability.
- Integrated backend RESTful APIs with **Dio and Retrofit**, configuring interceptors for token refresh, error handling, and offline caching.
- Participated actively in sprint planning, PR code reviews, and automated build workflows with **GitHub Actions (CI/CD)**.

FEATURED PROJECTS

Super Fitness & AI Coach App • Flutter, Gemini AI, BLoC, Hive, Firebase

[GitHub Repo] • Mar 2026 – May 2026

- Architected an interactive fitness platform using **Clean Architecture** with dynamic workout tracking and Firebase Auth.
- Integrated **Google Gemini AI API** with real-time response streaming for personalized coaching and workout plans.
- Implemented local data persistence with **Hive** and secured reliable code quality via **Unit & Widget Testing** (bloc_test, mocktail).

Flowers (E-Commerce Platform) • Flutter, BLoC, Google Maps, Mapbox, Stripe

[GitHub Repo] • Dec 2025 – Feb 2026

- Developed a feature-rich e-commerce app with dynamic product catalog, reactive global cart, and seamless Stripe checkout integration.
- Implemented live delivery tracking using **Google Maps SDK** with automatic fallback to Mapbox on non-GMS devices.
- Optimized rendering and pagination to ensure stable **60 FPS** performance and smooth scrolling across feed screens.

Flowers Rider (Driver Tracking App) • Flutter, BLoC, Firebase Firestore, GoRouter

[GitHub Repo] • Feb 2026 – Mar 2026

- Engineered a real-time driver delivery application utilizing foreground background services for live coordinate sync with **Cloud Firestore**.
- Managed app navigation and active order states using **GoRouter** with custom lifecycle guards.
- Configured network interceptors for automatic session handling, retry mechanisms, and offline resilience.

TECHNICAL SKILLS

Core & Mobile:	Dart, Flutter (Android & iOS), Cross-Platform UI, Material Design, Responsive Layouts
Architecture & State:	Clean Architecture, SOLID Principles, Repository Pattern, Dependency Injection (GetIt), BLoC, Cubit
APIs & Storage:	RESTful APIs, Dio, Retrofit, JSON Serialization, Hive, SharedPreferences, Secure Storage
Cloud & Services:	Firebase (Auth, Firestore, FCM, Crashlytics), Google Maps SDK, Mapbox, Stripe Integration
Testing & DevOps:	Unit Testing, Widget Testing, BLoC Testing (bloc_test, Mocktail), Git, GitHub Actions (CI/CD), Jira, Agile

EDUCATION

Bachelor of Laws (LL.B.) | Tanta University

2026

Self-taught Software Engineer with 1+ year of practical mobile application development and team delivery.
